

# REBUILD

8 SIMPLE STEPS FOR YOUR REBUILD

## STEP 1

### MEET ONSITE AND DISCUSS YOUR REBUILD

Meet onsite with your Loss Adjuster to talk over your claim; what's covered, what isn't, and what your options are. Your Rebuild Solution Manager will document your house and property.

## STEP 2

### SELECT YOUR BUILDER

Work with your Rebuild Solution Manager to select a builder who will suit your needs and meet IAG's criteria.

## STEP 3

### DESIGN YOUR NEW HOME

Design and plan your new home with the help of your selected builder, capturing any changes you'd like to make.

## STEP 4

### APPROVE PLANS AND PRICING

Once you have plans you're happy with, your Loss Adjuster, builder and Rebuild Solution Manager will cost the project and meet with you to approve the plans and pricing.

STEPS 1 - 4 WILL TAKE AROUND 15 WEEKS

## STEP 5

### SIGN THE CONTRACT & CONTRIBUTE FUNDS

Review and sign the building contract with your builder. You'll also need to contribute your EQC funds, any excesses and money towards any additional changes you're making.

## STEP 6

### APPLY FOR CONSENT

With your contract signed, your builder will apply for the building consent with your local council.

## STEP 7

### MOVE OUT SO WORK CAN START

If you're still living in your home, you'll need to move to your temporary accommodation while your home is rebuilt.

## STEP 8

### MOVE INTO YOUR NEW HOME

After a final inspection, you'll move into your brand new house.

STEPS 5 AND 6 WILL TAKE AROUND 10 WEEKS

STEPS 7 AND 8 WILL TAKE AROUND 20 WEEKS

TOTAL TIME - APPROXIMATELY 45 WEEKS
